

DIY: “Joy to the World” Ornament

This craft is perfect for the whole family, ages 6 and up.

Prep time: 30 min

Dry time: 30 min - 1 hour

Finishing touches: 10 min

Supplies:

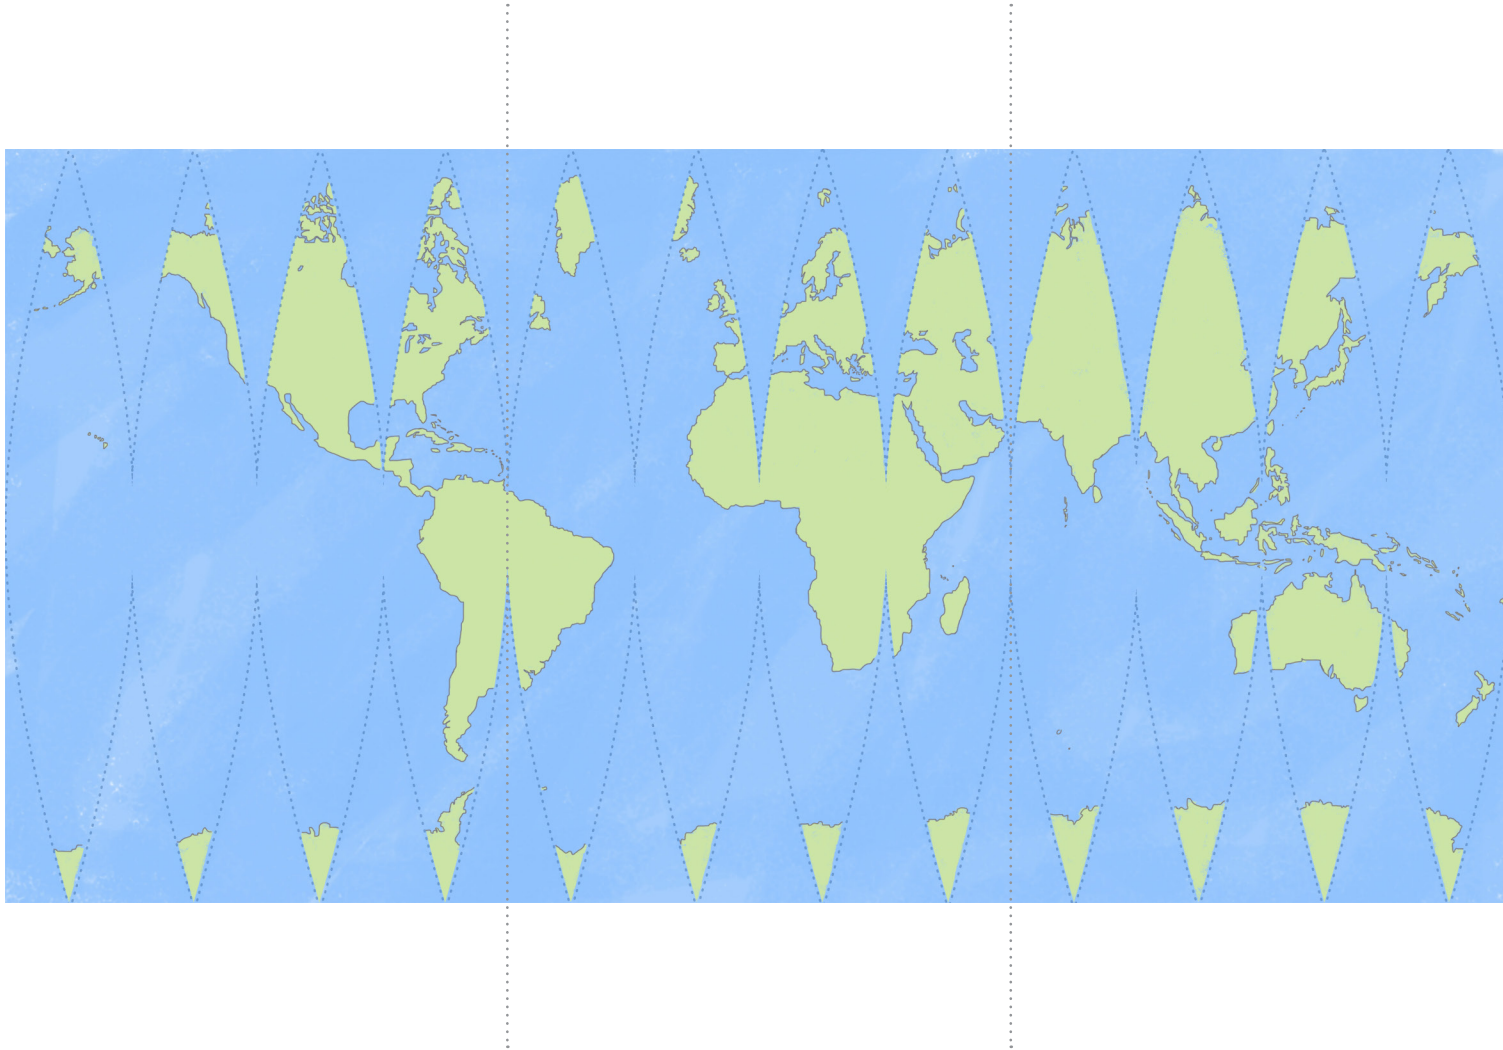

- Clear plastic ornament (2.5 in., 3 in. or 3.5 in.)
- Globe template (correspondent to the size of your ornament)
 - » Light blue
 - » Dark blue
 - » Color-your-own
- Mod Podge
- Paint brush
- Scissors
- Sharpies/paint pens (black, silver or gold)
- Optional: glitter paint

Instructions:

- Print out your template correspondent to your ornament size and cut them out along the dotted lines. The spikes are what allow the paper to go around the ornament.
- Cut the template into thirds along the dotted lines. This will make it easier to paste onto the ornament.
- Paint the Mod Podge onto the ornament. Align the "equator" with the center of the ornament and smooth the top and bottom of the first spike to the "north pole" and "south pole." Repeat with each spike, smoothing out bumps the best you can as you go.
 - » Pro tip: Work quickly and paint the Mod Podge one section at a time because it dries fast!
- Once your template is pasted, coat the ornament with one layer of Mod Podge and let it dry for one hour.
- When your ornament is dry, choose a marker and write “Joy to the World!”
- For some extra joy, add a light coat of glitter paint as your last step!
- Hang on your tree and enjoy for years to come.
